1. Working as a Medical Laboratory Technologist and Technician [NOC 2021: 32120 & 33101/ NOC 2016: 3211 & 3212]

Job Description

Medical laboratory technologists conduct a variety of medical laboratory tests to assist in the diagnosis, treatment and prevention of disease. Medical laboratory technologists may specialize in particular areas, such as clinical chemistry, clinical microbiology, hematology, histotechnology, transfusion science, diagnostic cytology and clinical genetics.

As a ***medical laboratory technologist*** you perform the following duties:

- Set up, operate and maintain laboratory equipment
- Do chemical analyses of blood, urine, cerebro-spinal fluid or other body fluids; study blood cells and other tissues to determine their relation to various physiological and pathological conditions
- Prepare tissue sections to demonstrate special cellular tissue elements or other characteristics for microscopic examination
- Set up, operate and maintain laboratory equipment
- Do chemical analyses of blood, urine, cerebro-spinal fluid or other body fluids; study blood cells and other tissues to determine their relation to various physiological and pathological conditions

Medical Laboratory Technologists & Technicians

A guide for newcomers to British Columbia

- Prepare tissue sections to demonstrate special cellular tissue elements or other characteristics for microscopic examination
- May establish procedures for the analysis of specimens and for medical laboratory experiments
- Do blood group, type and compatibility tests for transfusion purposes
- May establish procedures for the analysis of specimens and for medical laboratory experiments

Medical laboratory technicians conduct routine medical tests and set up, clean and maintain equipment.

As a *medical laboratory technician* you perform the following duties:

- Collect blood or other samples from patients
- Conduct routine laboratory tests and sample analyses
- Log patient samples and prepare them for testing
- Set up, clean and maintain medical laboratory equipment

Industry Overview

There is currently a shortage of medical laboratory technologists and technicians in B.C. There is an increased demand for *general medical laboratory technologists*. You may be in particularly high demand if you are willing to move to rural and remote communities in BC.

You may find new job opportunities in hospitals and medical laboratories that provide contracted diagnostic services. New job creation for clinical genetics technologists is also expected as a result of the growth of molecular testing.

Education and Experience

To work as a ***medical laboratory technologist or technician*** you require:

- completion of a two or three year medical laboratory education program approved by the British Columbia Society of Laboratory Science
<https://www.bcsls.net/schools-and-lab-programs>
- certification by the BC Society for Medical Laboratory Science and/or Canadian Society for Medical Laboratory Science is not mandatory, but is usually required by employers

Qualifications

This occupation is not regulated in British Columbia.

However, many employers prefer you to be certified by the BC Society for Medical Laboratory Science (for *medical laboratory technicians*) or Canadian Society for Medical Science (for *medical laboratory technologists*). To learn about certification see:

British Columbia Society for Medical Laboratory Science

<https://www.bcsls.net/certification>

Canadian Society for Medical Laboratory Science (CSMLS)

<https://www.csmls.org/>

Internationally Trained Medical Laboratory Technologists

If you wish to become a certified as a member of the Canadian Society for Medical Laboratory Science you must:

Medical Laboratory Technologists & Technicians *A guide for newcomers to British Columbia*

- apply for a prior learning assessment (PLA). The PLA evaluates your education, training and work experience and compares it to the national standard.
- write the CSMLS National Certification Examinations (if your PLA assessment is satisfactory)

For more information see:

CSMLS Internationally Educated Technologist Certification Process

Identifying the Right Position

When you browse job advertisements, you'll find a range of different job titles that are relevant.

For **medical laboratory technologists**, look for these related job titles:

- Immunology Technologist
- Clinical Laboratory Technologist
- Cytotechnologist
- Histology Technologist

Medical Laboratory Technologists & Technicians *A guide for newcomers to British Columbia*

- Histopathology Technologist
- Tissue Technologist – Medical Laboratory

For **medical laboratory technicians**, look for these related job titles:

- Clinical laboratory technician
- Biochemical technician
- Medical laboratory assistant
- Pathology assistant
- Phlebotomist

Creating a List of Potential Employers

You can use directories to produce lists of hospitals, medical laboratories and pharmaceutical businesses in Vancouver or the Lower Mainland. Contact them directly to find out if they're hiring.

- **Business in Vancouver – Book of Lists**

Biggest Life Sciences Companies in BC.

Available online at <https://biv.com/lists> and at the Central Library,
338.9711 B97b

- **Directory of Canadian Healthcare Personnel**
